SAFETY

	The lightning flash with arrow head within an equilateral triangle is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.
	The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Please follow all warnings, precautions and maintenance as recommended in this user's guide.

Important Safety Instruction

- RG1 IEC 62471-5:2015.
- Do not block any ventilation openings. To ensure reliable operation of the projector and to protect from over heating, it is recommended to install the projector in a location that does not block ventilation. As an example, do not place the projector on a crowded coffee table, sofa, bed, etc. Do not put the projector in an enclosure such as a book case or a cabinet that restricts air flow.
- To reduce the risk of fire and/or electric shock, do not expose the projector to rain or moisture. Do not install near heat sources such as radiators, heaters, stoves or any other apparatus such as amplifiers that emits heat.
- Do not let objects or liquids enter the projector. They may touch dangerous voltage points and short out parts that could result in fire or electric shock.
- Do not use under the following conditions:
 - In extremely hot, cold or humid environments.
 - (i) Ensure that the ambient room temperature is within 5°C ~ 40°C
 - (ii) Relative humidity is 10% ~ 80%
 - In areas susceptible to excessive dust and dirt.
 - Near any appliance generating a strong magnetic field.
 - In direct sunlight.
- Do not use the unit if it has been physically damaged or abused. Physical damage/abuse would be (but not limited to):
 - Unit has been dropped.
 - Power supply cord or plug has been damaged.
 - Liquid has been spilled on to the projector.
 - Projector has been exposed to rain or moisture.
 - Something has fallen in the projector or something is loose inside.
- Do not place the projector on an unstable surface. The projector may fall over resulting in injury or the projector may become damaged.
- Do not block the light coming out of the projector lens when in operation. The light will heat the object and could melt, cause burns or start a fire.
- Please do not open or disassemble the projector as this may cause electric shock.
- Do not attempt to service the unit yourself. Opening or removing covers may expose you to dangerous voltages or other hazards. Please call Optoma before you send the unit for repair.
- See projector enclosure for safety related markings.
- The unit should only be repaired by appropriate service personnel.
- Only use attachments/accessories specified by the manufacturer.

- Do not look straight into the projector lens during operation. The bright light may harm your eyes.
- Turn off and unplug the power plug from the AC outlet before cleaning the product.
- Use a soft dry cloth with mild detergent to clean the display housing. Do not use abrasive cleaners, waxes or solvents to clean the unit.
- Disconnect the power plug from AC outlet if the product is not being used for a long period of time.
- Do not setup the projector in places where it might be subjected to vibration or shock.
- Do not touch the lens with bare hands.
- Do not use or store the projector in places where smoke from oil or cigarettes may be present, as it can adversely affect the quality of the projector performance.
- Please follow the correct projector orientation installation as non standard installation may affect the projector performance.
- Use a power strip and or surge protector. As power outages and brown-outs can KILL devices.

Trademark Recognition

Kensington is a U.S. registered trademark of ACCO Brand Corporation with issued registrations and pending applications in other countries throughout the world.

HDMI, the HDMI Logo, and High-Definition Multimedia Interface are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries.

DLP®, DLP Link and the DLP logo are registered trademarks of Texas Instruments and BrilliantColor™ is a trademark of Texas Instruments.

All other product names used in this manual are the properties of their respective owners and are Acknowledged.

FCC

This device has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the device and receiver.
- Connect the device into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

Notice: Shielded cables

All connections to other computing devices must be made using shielded cables to maintain compliance with FCC regulations.

Caution

Changes or modifications not expressly approved by the manufacturer could void the user's authority, which is granted by the Federal Communications Commission, to operate this projector.

Operation Conditions

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference and
2. This device must accept any interference received, including interference that may cause undesired operation.

Notice: Canadian users

This Class B digital apparatus complies with Canadian ICES-003.

Remarque à l'intention des utilisateurs canadiens

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Declaration of Conformity for EU countries

- EMC Directive 2014/30/EC (including amendments)
- Low Voltage Directive 2014/35/EC
- RED 2014/53/EU (if product has RF function)

WEEE

Disposal instructions

Do not throw this electronic device into the trash when discarding. To minimize pollution and ensure utmost protection of the global environment, please recycle it.

INTRODUCTION

Package Overview

Carefully unpack and verify that you have the items listed below under standard accessories. Some of the items under optional accessories may not be available depending on the model, specification and your region of purchase. Please check with your place of purchase. Some accessories may vary from region to region.

The warranty card is only supplied in some specific regions. Please consult your dealer for detailed information.

Standard accessories

Note: *For European warranty information, please visit www.optoma.com

Optional accessories

Note: Optional accessories vary depending on model, specification and region.

INTRODUCTION

Product Overview

Note:

- Do not block projector intake and exhaust vents.
- When operating the projector in an enclosed space, allow at least 10cm clearance around the intake and exhaust vents.

No	Item	No	Item
1.	Keypad	4.	Ventilation (outlet)
2.	Ventilation (inlet)	5.	Focus Wheel
3.	Input / Output	6.	Lens

INTRODUCTION

Connections

No	Item	No	Item
1.	Headphone Connector	4.	DC IN Connector
2.	HDMI / MHL Connector	5.	Power Reset
3.	USB 5V Output (5V 1A)		

Keypad

No	Item	No	Item
1.	Menu	4.	Mode Selection*1
2.	LED Indicator	5.	Four Directional Select Keys*2
3.	Power Button		

Note:

- *1 Press the  to show the Display mode menu, and click again to close the Display mode menu.
- *2 When the Display mode menu is on, you can use the  key to select a Mode.

SETUP AND INSTALLATION

Connecting sources to the projector

No	Item	No	Item
1.	Audio Out Cable	5.	Power Adapter
2.	HDMI Cable	6.	USB Power Supply (5V---1A)
3.	MHL Cable	7.	HDMI Dongle
4.	USB Cable		

Note: If you charge the battery using a USB cable and display an HDMI source with an audio output simultaneously, the cooling fan speed may increase.

SETUP AND INSTALLATION

Focus

To adjust the focus, turn the focus wheel clockwise or counterclockwise until the image is sharp and legible.

Note: The projector will focus at a distance of 0.6m to 1.9m.

USING THE PROJECTOR

Powering on / off the projector

Powering on

Note: Before powering on the projector for the first time, you need to fully charge the battery.

1. Attach the correct power plug that is supported in your region to the power adapter.
2. Connect one end of the power adapter to the DC IN connector on the projector.
3. Connect the other end of the power adapter to the electrical outlet. When connected, the LED indicator will turn red and the battery starts charging.

Wait until the LED indicator will turn blue which means the battery is fully charged. More information on LED colors, refer to page 20.

4. Connect the signal/source cable.
5. Long press (> 1s) the **Power** button  on the rear panel of the projector.

The first time the projector is powered on, you will be prompted to select a preferred OSD language. Press the ▲▼ keys to select your preferred language.

Note:

- Short press (< 1s) the **Power** button  to turn on or turn off the power bank while running on battery mode (power adapter is unplugged).
- In active mode (the projector is powered on), the power output through the MHL connector and USB connector simultaneously is not supported. The MHL connector has higher priority, meaning the power output from the USB connector will be cut off.

USING THE PROJECTOR

Powering off

1. Turn off the projector by pressing the **Power** button  on the rear panel. The following message will be displayed:

2. Press the **Power** button  again.
3. Disconnect the power adapter from the projector and the electrical outlet.

Note: It is not recommended that the projector is turned on immediately, right after a power off procedure.

Menu navigation and features

The projector has multilingual on-screen display menus that allow you to make image adjustments and change a variety of settings.

1. To open the OSD menu, press the  key on the projector keypad.
2. When the OSD is displayed, press the   keys to select any item in the Main Menu. While making a selection on a particular tab, press the   keys to select sub menu items.
3. Press the   keys to select the setting or adjust a value.
4. To exit, press the  key again. The OSD menu will close and the projector will automatically save the new settings.

USING THE PROJECTOR

USING THE PROJECTOR

Display menu

Display mode

There are many factory presets optimized for various types of images.

- **Bright:** Choose this mode for brighter and more saturated colors.
- **Standard:** Choose this mode for natural looking colors with a balance of warm and cool tones.
- **Eco:** Choose this mode to dim the projector light source which will lower power consumption and extend the light source life.

Brightness

Adjust the brightness of the image.

Contrast

Adjust the contrast of the image.

Projection

Specify the orientation to use for the image.

Aspect ratio

Select the aspect ratio of the displayed image.

- **Auto:** Automatically selects the appropriate display format.
- **4:3:** This format is for 4:3 input sources.
- **16:9:** This format is for 16:9 input sources, like HDTV and DVD enhanced for Wide screen TV.

Note: A 16:9 image is scaled down automatically to the size 1280x720.

Keystone menu

V Keystone

Adjust image distortion vertically and make a squarer image. Vertical keystone is used to correct a keystone image shape in which the top and bottom are slanted to one of the sides. This is intended when for use with vertically on-axis applications.

USING THE PROJECTOR

Volume menu

Volume

Adjust the audio volume level.

Information menu

Information

Review software version, current input source, and signal type.

Language menu

Language

Select the multilingual OSD menu between English, German, Spanish, French, Italian, Portuguese, Russian, Japanese, Traditional Chinese, and Korean.

USING THE PROJECTOR

Setting menu

Logo

Select the logo that is displayed when no signal is available.

Reset

Return the factory default settings for all settings.

ADDITIONAL INFORMATION

Troubleshooting

If you experience a problem with your projector, please refer to the following information. If a problem persists, please contact your local reseller or service center.

Image problems

-  *No image appears on-screen*
- Ensure all the cables and power connections are correctly and securely connected as described in the "Installation" section.
 - Ensure the pins of connectors are not crooked or broken.
 - Ensure that the volume is not set to "0".
-  *Image is out of focus*
- Adjust the focus using the focus wheel. Please refer to page 10.
 - Make sure the projection screen is between the required distance from the projector. Please refer to page 18.
-  *The image is stretched when displaying 16:9 DVD title*
- When you play anamorphic DVD or 16:9 DVD, the projector will show the best image in 16:9 format on projector side.
 - If you play 4:3 format DVD title, please change the format as 4:3 in projector OSD.
 - Please setup the display format as 16:9 (wide) aspect ratio type on your DVD player.
-  *Image is too small or too large*
- Move the projector closer to or further from the screen.
 - Press the  key on the projector panel, go to "Display > Aspect Ratio". Try the different settings.
-  *Image has slanted sides:*
- If possible, reposition the projector so that it is centered on the screen and below the bottom of the screen.
 - Use "Keystone > V Keystone" from the OSD to make an adjustment.
-  *Image is reversed*
- Select "Display > Projection" from the OSD and adjust the projection direction.

Other problems

If the system can't be turned on/off properly, press RESET key to reset.

-  *The projector stops responding to all controls*
- If possible, turn off the projector, then unplug the power cord and wait at least 20 seconds before reconnecting power.

ADDITIONAL INFORMATION

LED lightning messages

Message	LED Indicator
